MERIDIAN

Empowering the Asset Lifecycle

Transforming engineering data into actionable plant information, keeping users in control, compliant, aligned, and informed throughout the asset lifecycle.

Meridian is Asset Lifecycle Information Management software that connects maintenance and engineering, supports concurrent engineering, and improves data handover. Unlike departmental point solutions that are restricted in scope, Meridian provides a comprehensive solution for managing concurrent plant modifications of all scales, and maintaining as-built master data for operations and maintenance. Work with information in the cloud or on premise, at your desktop or on the go with your mobile device, within your organization or with external contractors and stakeholders.

MERIDIAN ANALYTICS

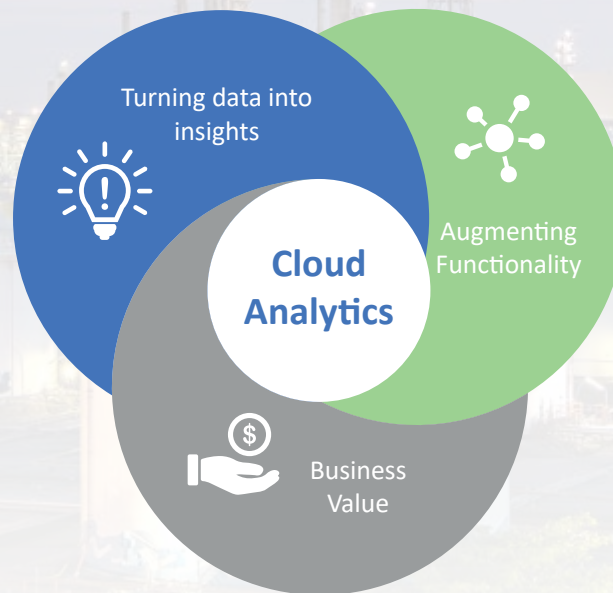

Extend the value of your asset information with powerful insights from robust analytical capabilities.

Meridian Analytics is a cloud service extension providing analytical capabilities that enhance the value of your Meridian experience with powerful insights on your asset information. These cloud services provide capabilities to evaluate and improve your data and metadata.

MERIDIAN ANALYTICS

Metadata Quality Management

Meridian Analytics provides unprecedented visibility into the metadata on the documents and information that you manage within Meridian. Quickly and effectively analyze data quality and integrity, and plan for improvement. Navigate large datasets by time, location, contractor, asset and more, to find and diagnose areas for improvement.

MERIDIAN ANALYTICS

FOCUS EFFORT ON PROBLEM AREAS

Meridian Cloud Analytics helps you pinpoint all the bottlenecks in your engineering processes by helping you categorize and filter performance metrics.

DELIVER PROJECTS FASTER

With this insightful analytics tool, your team can review performance metrics for projects, documents, and workflows and gain quick access to the items causing the problem.

IMPROVE SEARCH RESULTS

Meridian Cloud Analytics makes it easy to analyze your existing metadata, measure metadata quality, and set quality targets, offering an easy and practical way to improve metadata quality.

ACCURATE REPORTS FOR BETTER DECISIONS

Improving your metadata quality with Meridian Cloud Analytics yields more accurate reports. You'll be able to efficiently analyze existing metadata, measure its quality, and set quality targets.

BETTER METADATA QUALITY ON HANDOVER

Meridian Cloud Analytics, offers a powerful way to measure metadata quality in live projects and quickly identify sources of poor data quality as it happens.

MAINTAIN HIGH LEVEL OF METADATA QUALITY

Maintain a high level of metadata quality through Meridian Cloud Analytics' improved pick lists, which make it much easier to analyze existing metadata.
